

## Writing Task - Future Preoccupation

### Report

Directions: Think about what you want to be doing in the future, e.g. become a doctor, a football player, a teacher, a singer etc., and write a report discussing the following points:

1. What is the preoccupation? Why would you like to be doing that? What makes this job so interesting and attractive to you?
2. What skills will you need to have/develop in order to be allowed to do your job? What skills will you need to have in order to do your job once you start doing it? How can you acquire the necessary skills?
3. What education/training will you need? Do you need to go to university? Where can you study? How much will it cost and how many years will it take? Give real examples. Talk about possible options – for example – studying in Bulgaria or abroad, in Sofia or in the country... (add links at the end of the report)
4. If you can, find the average salary for your desired position in Bulgaria and abroad.
5. Find real job offers and detail what skills are expected of you, what education and work experience (add links at the end of the report).
6. Add everything else that you may find relevant to the topic.

Be specific, give real examples and look for adequate and trustworthy information. Make sure you read a few job offers and you find the necessary information about higher education. Include any additional training that may be needed.

There is **no** word limit but stick to the topic because straying off-topic will be penalized. Be serious and prepare carefully.
